

Central Los Angeles residents lack walkable access to COVID-19 vaccine sites in 2020

Produced by Gabe Hafemann, January 2025 with data from URISA GIS Corps - "Covid-19 Vaccination Provider Locations in the United States"

Legend

- Provider Location
- 1/4 Mile Radius of Vaccine Sites
- Census tracts with some residents within walking distance
- Necessitates car travel or public transit
- Null values

Percent of households with no vehicle available

- ≥ 20%
- No Value

The Florence-Graham, West Dormont, and West Rancho Dominguez neighborhoods would be good candidates for future mobile vaccine outreach projects due to their low rates of vehicle access and current lack of walkability to vaccination sites.
